

Auto Seal has arrived

EasyLife is so extraordinary, it practically fits itself

Sometimes it's okay to expect immediate results. That's why we developed EasyLife with revolutionary Auto Seal technology.

We named it EasyLife. You'll call it your favorite set-up mask. With its patented Auto Seal technology, the EasyLife nasal mask nearly eliminates the need for manual mask adjustments. Its innovative, lightweight design features a unique dual-cushion construction – the inner cushion creates an instant, self-adjusting seal, while the outer cushion provides comfortable support. The only manual steps necessary are intuitive headgear adjustments, making fitting as easy as possible. Helping you fit 100% of your patients, 100% of the time is, quite simply, easier with EasyLife.

PHILIPS

RESPIRONICS

Forehead pad adjusts automatically – eliminating a traditional fitting step – and requires minimal headgear force.

Only four parts:
mask frame, headgear,
outer support cushion,
inner seal cushion.

Angled exhalation micro
ports make operation
quieter and redirect air
away from the bed partner.

Outer support cushion lets the mask rest lightly and comfortably against the patient's face, eliminating the need to over-tighten the headgear.

Inner seal cushion creates an instant, self-adjusting seal.

Ordering information				
EasyLife mask	Small	Medium	Medium wide	Large
Mask with headgear	1050021	1050022	1050023	1050024
