StayHear+ Sleep tips

**Mask unwanted sounds**  
with two wireless sleepbuds™  
that provide up to 16 hours of  
soothing sounds

**Manage features**  
with the required  
Bose Sleep App

## Features & Benefits

Noise-masking sleepbuds™	Replaces unwanted noise with soothing sounds so you can get to sleep, and stay asleep.
Rechargeable, high-energy density battery (Silver-Zinc)	The silver-zinc micro batteries in the sleepbuds™ provide up to 16 hours of soothing sounds for a full night's rest. Generally used in applications like hearing aids, silver-zinc micro batteries are safe for wearable applications.
Rechargeable, combination travel case/charger	Compact case conveniently stores and keeps sleepbuds™ safe; provides one full charge without having to plug them in.
Bluetooth® Low Energy	Bose sleepbuds™ don't use classic Bluetooth®, and thus they don't stream music. Instead, they use Bluetooth® Low Energy (BLE) technology. BLE consumes considerably less power, and therefore enables a truly wireless connection, while keeping the form-factor as small as possible.
Bose Sleep App	Set wake-up alarms, choose among ten pre-loaded soothing sounds, control the volume and manage updates.
StayHear+ Sleep tips	Comfortable enough to wear all night long, regardless of sleeping position; available in three ear tip size options.
